GIANT DARWIN TULIPS

These gorgeous new late or May-flowering Tulips are very stately and beautiful—producing immense flowers on tall sturdy stems attaining a height of from two to three feet. The flowers are models of perfection in form, lasting wax-like substance—and in a great variety of both dainty and richly brilliant colorings. The Darwin Tulips are exceedingly effective when grown in groups of one variety in the garden or herbaceous border. As cut flowers they are unsurpassable. They may be forced if brought into the heat not earlier than January. Leaflet, "How to Grow Bulbs," free with every order.

BRING THE REAL GLORY
OF SPRING TO YOUR
GARDEN
BY PLANTING
RENNIE'S
STRAINS OF BULBS
WHICH HAVE GAINED HIGHEST
AWARDS AT THE PRINCIPAL SHOWS

For Exquisite Color, Size, and Perfection of Bloom these Bulbs are Unrivalled

PLEASE READ CAREFULLY

TIME OF PLANTING.—To the beginner we would particularly emphasize the fact that now and not Springtime is the time to plant all kinds of spring flowering bulbs. The larger part of the bulbs offered in this catalogue reach us from Holland early in September, and the sooner they are planted after that, the greater will be the measure of success; therefore order early.

WHEN SHIPMENTS CAN BE MADE.—The general line of bulbs will be ready for shipment in September. A few kinds (chiefly Roots and Lilies) are not ready for shipment before November, as they are not matured enough to take up before that time. Therefore please note that all general orders will be shipped as soon as received in September, and the balance will be forwarded as early in November as possible.

BULBS BY MAIL OR EXPRESS.—All bulbs herein quoted will be sent to any office in Canada, prepaid, when ordered at delivered

prices, except where noted. Postage to Newfoundland—12 cents per lb., or fraction thereof, must accompany all orders, otherwise it will be deducted.

ORDERS.—All orders are filled in rotation as received. We would advise early orders to ensure their being filled complete, as later in the season some varieties become exhausted, when we must reserve the privilege of supplying another sort as near the color as possible, but shall always substitute an equal if not better variety than ordered.

REMITTANCE.—All orders must be accompanied with the cash for full amount of order, which may be sent by Registered Letter, P.O. Order, Postal Note or Express Order.

ADDRESSES.—Please be careful and write your Name, Post Office and Province plainly, that there may be no disappointment by orders being incorrectly sent.

RENNIE'S CHOICE DUTCH HYACINTHS

IN SEPARATE COLORS, FOR BEDDING-OUT OR FORCING

Good sized flowering bulbs, much larger than the Mixed Hyacinth bulbs usually sent out. They are well adapted for open-ground planting, in mixed borders and informal beds, and on account of their low price are also extensively forced for winter blooming and cutting. The list offered below includes nearly every shade of red, white, blue, yellow, etc.

GROWING HYACINTHS OUTDOORS

The bulbs may be planted any time from October to December—the earlier the better. They succeed in any good, well-drained garden soil. Set the bulbs so that the tops will be 3 or 4 inches below the surface and 6 to 10 inches apart. Before very severe weather comes on, cover the beds with straw, leaves or manure to protect them from the frost, but care should be taken that this covering is not too thick, as the bulbs are as likely to be injured by being kept too warm as by freezing. The mulching should be removed in March or April.

DUTCH ROMAN HYACINTHS

ALSO CALLED MINIATURE HYACINTHS

92. These Hyacinths are excellent for growing in pots, pans or boxes; they bloom very freely, often producing 3 or 4 spikes. They are equally desirable for culture outdoors; they should be planted closer together than the "Dutch Hyacinths." Culture is the same as recommended for the Roman Hyacinths, and they come into bloom after the Roman Hyacinths are exhausted. The flowers are pink, white and light blue in various shades. Each 5c, doz. 40c, per 100 \$2.50, delivered.

GRAPE HYACINTHS

93. One of the prettiest of early spring flowering bulbs, growing about 6 inches high and throwing up numerous spikes of clear blue or white flowers, which resemble a miniature bunch of grapes. They are hardy and once planted take care of themselves; in clumps or lines they are very effective, 8 to 12 bulbs in a 6-inch pan make a pretty plant for window decoration, blooming at Easter. **Mixed Colors:** 4 for 10c, doz. 20c, per 100 \$1.00, postpaid.

MAMMOTH CROCUS

Crocus are among the earliest of spring flowers, and are most effective when planted under the sod about the lawn.

Crocus grow to perfection in Our Prepared Bulb Fibre. Plant 6 to 8 bulbs in a bowl or other receptacle 5 to 6 inches in diameter. Grow slowly and in not too high atmosphere. They will not stand much heat and love a rather moist atmosphere.

NEW CROCUS "KING OF THE WHITES"

SINGLE EARLY TULIPS

For cultural directions see our pamphlet, "How to Grow Bulbs," free with every order.

The letters A, B, C, preceding the varieties, indicate their earliness of Bloom. The A's flower together and are the earliest, B next, etc. The average height in inches is also given to aid in arranging flower beds. ORDER BY NUMBER.

IRIS (Flowering Flag)

Are you a flower enthusiast, and as such could you possibly overlook the section of Iris, this flower of beauty and charm singularly all its own? From the small and low-growing spring sorts followed by English, Spanish and other species until rounded out by the gorgeous Japan Kaempferi sorts, this flower is a beauty all its own. Well called the orchid of the poor man's garden.

570. Japanese (Kaempferi).—Ready in October. The magnificence of these splendid new Irises surpasses description; in beauty, size of flower, richness of coloring, they are grand. The flowers are of enormous size, averaging from 6 to 8 inches across, and of indescribable and charming hues and colors, varying like watered silk in the sunlight, the prevailing colors being white, crimson, rose, lavender, violet and blue. Attains greatest perfection if grown in moist soil. Each 25c, doz. \$2.40

Spanish Iris (Iris Hispanica).—A slender growing, beautiful species. Blooms during May and June according to season. Is unexcelled for growing in the house in a rather cool atmosphere. If grown in pots with soil it needs good drainage and moderately rich soil. Plant 6 to 8 bulbs, according to size, in a 6-inch bowl or pot. Can be placed in the light at once. TWO PURE CALF MEALS

MADE IN BRITAIN

"CREAM EQUIVALENT" contains practically twice as much oil as the average calf meal, and as oil or fat is the most important constituent of a meal of this kind, this fact enhances its value considerably, as a substitute for milk, over other calf meals. Price ex-warehouse Toronto: 50 lb. bag \$2.75; per 100 lbs. \$5.25.

BIBBY'S CALF MEAL.—Does not contain as much oil as 'Cream Equivalent' but is richer in protein and is recommended for growing Calves and young Pigs. Price at Toronto, per 100 lbs. \$4.75.

Sold by leading Canadian Merchants all over Canada. Write us if your local dealer does not stock them.

The Finest Lawns in Canada are made with **RENNIE'S Lawn Seed**, which produces a perfect and permanent sward, luxuriant, rich and green, in four to six weeks' time; also valuable for quickly renovating worn-out lawns. Used by thousands from Halifax to Vancouver.

MAKING A NEW LAWN

We are always pleased to give full information and directions for the establishment of new lawns under any condition of soil. Ask for Booklet on Lawns and Greens.

QUANTITIES TO USE.—Although less seed gives good results, we recommend sowing 1 lb. for 150 sq. ft., 50 lbs. for one-fourth acre, where a very close matted turf is required quickly. If intended for renovating an old lawn, about half the above quantity is sufficient. May be sown from April to the end of September.

RENNIE'S BEST XXX LAWN SEED

Is by far the best mixture of grasses offered for the purpose of quickly producing a permanent lawn. It is prepared from our own formula, and is a careful blending of varieties adapted to producing the thick growth and velvety appearance so much sought after. The grasses composing this mixture grow during different seasons of the year, so that a deep green, velvety sward is maintained year after year, and without burning brown in summer, its constant luxuriance rivalling the famous lawns of Old England. Whether you want to seed a small grass plot in your yard, or a lawn of more pretentious size, you should use this grass mixture. By express, at purchaser's expense, **1b. 40c, 10 lbs \$3.50.**

RENNIE'S EVERGREEN

A perfect balanced combination of the best fine-leaved, deep-rooting grasses. **Lb. 40c, 10 lbs. \$3.50 delivered.**

RENNIE'S SHADY-NOOK SEED

FOR SHADED SPOTS. This is a special mixture of grasses that flourish best in shaded situations, and never fails to revive the dead and sour places that often ruin the effect of an otherwise perfect lawn. Sow 1 lb. to every (20 x 15 ft.) 300 ft. **Lb. 55c, 10 lbs. \$4.50 delivered.**

RENNIE'S TOUGH TURF GRASS SEED

FOR ATHLETIC FIELDS

"TOUGH TURF" is a special blend for ball grounds, cricket grounds, and other athletic fields. This mixture forms a thick, strong, quick-growing, enduring turf that will stand any amount of hard usage without showing wear and tear. **Lb. 35c, 10 lbs. \$3.00 delivered.**

RENNIE'S BOWLING LAWN

We have made a special study of Grass Seeds for Bowling Lawns. This seed is a mixture of strictly perennial grasses specially adapted to produce a close, fine enduring sward. Sow $4\frac{1}{2}$ lbs. per rink (12 x 100 ft.). **Lb. 40c, 10 lbs. \$3.50 delivered.**

RENNIE'S GOLF PUTTING GREEN

Noted for grasses with that velvety appearance and such as produce the closest sward. Sow 40 lbs. per 60 x 60 ft. **Lb. 45c, 10 lbs. \$4.00 delivered.**

RENNIE'S PURE DUTCH LAWN CLOVER

Many prefer the Lawn Clover to mixture of grasses, and the fact cannot be denied that a lawn of Clover only is magnificent. Dutch Clover is a good thing to sow along with other grasses, as it materially assists their growth. Fancy clean seed. **Lb. 85c, 10 lbs. \$7.50 delivered.**

RENNIE'S CHOICE DUTCH HYACINTHS IN SEPARATE COLORS, FOR BEDDING-OUT OR FORCING

Good sized flowering bulbs, 15 centimeters ($5\frac{1}{2}$ in. and upwards in circumference), much larger than the Mixed Hyacinth bulbs usually sent out. They are well adapted for open-ground planting, in mixed borders and informal beds, and on account of their low price are also extensively forced for winter blooming and cutting. The list offered below includes nearly every shade of red, white, blue, yellow, etc.

HYACINTHS IN SEPARATE COLORS

Each 6c, doz. 60c delivered. By express at purchaser's expense each 5c, doz. 40c, 100 \$3.00. Mixed colors, per 100, \$2.50.
